

Summer Internship 2025

Web Development Internship – Week 1 Tasks (Using HTML & CSS)

Theme of the Week: Multi-page website and Responsive Design

Task 1: Create a Multi-Page Portfolio Website (HTML + CSS)

Objective: Build a personal portfolio with multiple linked pages and a clean layout.

Instructions:

- Create a 3-page website:
 - `index.html` – Home
 - `about.html` – About Me
 - `projects.html` – Projects or Work Samples
- Add a **navigation bar** to all pages (using `<nav>` with internal links).
- Include:
 - Sectioned layout with headings, text, and images
 - A responsive layout using media queries (adjust for mobile screens)
 - A fixed footer with your name and copyright

Use `display: flex` or `grid` for layout structure.

Goal: Practice semantic HTML, internal navigation, and responsive design techniques.

Task 2: Build a Custom Responsive Layout (CSS Flexbox or Grid)

Objective: Build a layout using **only HTML and CSS** that mimics a basic webpage layout like a blog or service page.

Instructions:

- Create a new page `layout.html`
- Design a layout with:
 - A header
 - A sidebar (left or right)
 - A main content area
 - 2–3 content cards/boxes
 - A footer
- Use **CSS Flexbox or CSS Grid** to build the layout
- Make it **responsive**: test on desktop and mobile

Goal: Learn real layout building with modern CSS methods (Flexbox or

Summer Internship Program 2025
